

## Appendix G

# SEMINARS

Date	Title	Speaker	University / Institution
<b>2006</b>			
24 Jan	The QSO HE1013-2136 ( $z=0.785$ ): tracing the ULIRG - QSO connection towards large look-back times?	J. Heidt	Landessternwarte Heidelberg
3 Mar	Dwarf elliptical galaxies in clusters: near InfraRed perspectives	S. Zibetti	MPE, Germany
6 Mar	Cosmological Inflation	D. Paraficz	NOT
9 Mar	Formation, evolution and multiplicity of brown dwarfs and giant exoplanets	J. A. Caballero	ING
21 Apr	The chemical composition and the evolution of the Galaxy: halo, thick disk, and bulge	R. Gratton	Padua Observatory, Italy
27 Apr	High redshift Ly-alpha emitters in the GOODS-S field	K. Nilsson	ESO
5 Sep	The search for extrasolar planets: study of line bisectors and its relation with precise radial velocity measurements	A. Fiorenzano	TNG
11 Dec	The Tunable Heterodyne Infrared Spectrometer THIS	G. Sonnabend	Cologne, Germany
18 Dec	Recent developments around the European Extremely Large Telescope project	R. Rутten	ING
<b>2007</b>			
16 Jan	New tip-tilt system for GLAS	J. Skvarc	ING
5 Feb	Astronet: A Science Vision for European Astronomy	D. Lennon	ING
1 Mar	Spins and Origins of Near-Earth Objects	A. Fitzsimmons	QUB
8 Mar	Constraints on supernova progenitors from local stellar populations	J. P. Anderson	Astrophysics Research Institute, LJMU
16 Aug	Transiting extrasolar planets	M. Hrudková	ING and Charles University, Czech Rep.
16 Aug	Rotation and massive star evolution	I. Hunter	ING and QUB
16 Oct	Properties of the Broad Line Region of quasars at $z\sim 0.3$	R. Decarli	Istituto Nazionale di Fisica Nucleare, Italy
23 Oct	ULTRASPEC: High-speed spectroscopy with zero readout noise	V. Dhillon	Sheffield University
6 Nov	Observational Evidence for Radiative Grain Alignment	B-G Andersson	SOFIA/USRA, USA
